

STONY PLAIN SUN.

VOLUME NINE.

STONY PLAIN, ALBERTA. THURSDAY, SEPT. 13, 1928.

Whole Number 423

Open Seasons for Game

Following are open seasons for game—
Ducks and Geese—Sept 15 to Dec 15th.
Hungarian Partridge—Oct 1 to Nov. 30
Prairie Chicken and Partridge—No open season.
Deer—Nov 1 to Dec 14
Otter, Nov. 1 to May 1.
Beaver, No Open Season.
Muskrat—Between North Sask. River and Tp. 91, March and April only.
Game Licences can be had at Sun Office, where copies of the Game Act can be seen.

Nelson-Goebel.

At St. Matthew's Church (Manitoba Synod) at Spruce Grove, on Saturday, Sept. 8, Miss Emma Goebel (daughter of Mr and Mrs P. Goebel of Spruce Grove) was united in marriage to Mr Orville Galbraith Nelson of Edmonton. The ceremony was performed by the pastor of the church, Rev G Poetsch.

United Church Notes.

On Sunday last a splendid service was held in the United Church. A special solo was sung by Mrs Yeats, which was greatly appreciated. Rev G A Sauder took as his subject "The Upward Look," based on Psalm 121, 2. The attendance was very good. There is still room for more, as special provision is being made to accommodate all who will come.

The United Church Ladies Aid meets this week at the home of Mrs R M Outway. Mrs L Kowensky is acting as hostess.

LOCAL NEWS.

John K Miller, Detroit, is visiting here with his parents, Mr and Mrs Ph Miller.

Mr D W Pattie purchased a Desoto Six motor car while spending his holidays in Stony Plain.

Melvin Witmer, son of Mr and Mrs Cyrus Witmer, returned this week to Plymouth, Wis., where he resumes his college studies.

Mr M Turlock resumes his duties as section boss at Wolf Creek on Saturday next. His family, which has been living in Stony, will shortly move back to the Creek.

Arthur Lutz, who suffered injuries in an auto accident last week by diving thru the windshield, is doing very nicely at the Edmonton to where he was taken after the accident.

Bob Stoker is said to be on a visit to his native State, Kansas.

Mr A Jespersen has purchased a Chevrolet Utility truck, for use on the farm.

The open season for ducks, geese, rails, coots and Wilson snipe begins on Saturday next the 15th.

Inga Councillors are billed to meet in Stony Plain on Friday, Oct. 5.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Mecklenburg, eye specialist, 10159 101st St., Edmonton.

Notes of Edmonton Beach.

The Southern Orchestra, Edmonton's celebrated musicians, filled an engagement at the Beach Saturday evening, and the dancers were highly pleased with the music provided.

The particularly fine weather on Sunday brought a record crowd to the Beach, about 400 cars being there at one time.

An Edmonton orchestra has been retained by Mr Barrie on next Saturday night. Weather permitting.

New Pastor at Tomahawk Lutheran Church.

The Lutheran church at Tomahawk was crowded on Sunday last, when the new pastor, Rev Otto Eifert, was inducted into the pastorate by Rev B F Behrends of Fort Saskatchewan.

Rev Eifert comes from Minnesota, and is a graduate of Concordia Seminary at St. Louis.

The inducting minister, Rev Behrends, was formerly in charge at this church, and met a number of old friends at the close of the service.

Pastor Eifert's circuit will include Keep Hills, Mewasin, Rocky Rapids. The Tomahawk parish extended until recently west beyond Edson. The field has been divided and another man will be stationed at Edson.

See the New UTILITY TRUCK

Built to Win Favor on Western Farms

EQUIPPED with the special grain body illustrated, the New Chevrolet Utility Truck is the ideal haulage unit for the Western Canada farmer.

It handles full loads with the greatest ease . . . enables you to cut down the time and expense of hauling . . . and offers dependable performance, even in heavy mud and sand. Practically every part of its chassis is oversize. Come in and see the new Chevrolet Utility Truck! You will find that it affords everything you could possibly want in a haulage unit of this capacity—unusual pulling power—remarkable performance—amazing handling ease—and outstanding economy of ownership and operation.

Let us give you figures on its low maintenance costs.

The Impatient West

Twenty-five years ago the population of the three prairie provinces was considerably less than one million people; today it is well over two million people. Nevertheless Western people talk of the slow growth in population, and are severely critical of the Government at Ottawa, irrespectively of its political complexion, and the immigration policies which have prevailed.

Twenty-five years ago Manitoba was largely an undeveloped province, while the Provinces of Saskatchewan and Alberta were yet to be born, this vast territory being known as the North-West Territories, lacking a fully autonomous form of government, and without many of the institutions, services and conveniences enjoyed by the people in other parts of the Dominion.

Today these three provinces are as well organized, as up-to-date, as well served in most respects and better in some, than the older provinces. Twenty-five years ago, with the exception of the main line of the C.P.R. and a few north and south branch lines, this western country lacked railway facilities. Today the whole country is criss-crossed by numerous main lines east and west, and by branches radiating out in all directions, while hundreds of additional miles of branch lines are being constructed every year. In this short space of time, Saskatchewan, the central of the three provinces, has out-distanced every province except Ontario in railway mileage.

During these twenty-five years the production of the West has doubled and tripled and re-tracked; hamlets have become villages, villages have grown into towns, towns have developed into modern cities; municipal systems have been created which compare favorably with those of older lands; courts of justice have been organized; thousands of schools have been erected, high schools, collegiate institutes and universities established; great elevator systems have been created; the telephone has been carried into the most humble rural home.

The old ox-cart, the wagon, the buggy, has given way to the automobile; the single furrow plough and yoke of oxen has been superseded to a large extent by the tractor and gang plough; the winding trails leading across the prairie, up hill, down dale, and through the valleys to the far distant little railway station, calling for days and nights on the road to market a load of grain, have been converted into well built earth roads, graded to a standard, with bridges and culverts eliminating the old mudholes. Tens of thousands of miles of these good market roads have been built in the last ten or fifteen years, and millions of dollars thereby saved to the people of these provinces.

But are the people satisfied? Not a bit of it. When the well designed, properly graded and constructed road, with good drainage, bridges and culverts replaced the old rutted trail and ungraded road, the people were enthusiastic and more than satisfied. But the best of earth roads makes hard going after days of rain, and roads which were regarded as eminently satisfactory even three short years ago, are now roundly criticized and condemned because they are not all-weather roads.

The West is impatient. In many respects it is an excellent quality. The West is not and never will be content with less than the best. And what it wants, it wants immediately. It is impatient at delay. Take this matter of roads. If other provinces, states and countries can have gravelled roads and paved roads, why can't the West have them? Well, the West can have them if the people of the West are prepared to pay the price. But Ontario and Quebec, and the States to the south, and the countries of Europe did not enjoy hard-surfaced highways when they were only twenty-five years old, and when their populations were small, and their accumulated wealth not great. These things came to them gradually. But the West is impatient. We are living in an age of rapid improvement, and the West must have everything others have irrespective of its numbers or wealth.

It is not sufficient that in twenty-five years the West has created great provinces out of virgin territory, and supplied its people in that short space of time with institutions, public services, and conveniences which other and older, and wealthier lands took hundreds of years to provide. Thus it is that in Alberta the U.P.A. Government, under Premier Brownlee, the Liberal Government, under Premier Gardiner, in Saskatchewan, and the Bracken Farmers' Government, in Manitoba, are all under fire because they have not gravelled or paved many thousands of miles of roads, although in order to do so the public debts of these provinces would have been enormously increased and the taxes imposed made much heavier.

And no sooner are roads gravelled than a new demand is made. In Manitoba complaint is now made that these gravelled roads are too dusty, and the Government of that Province is called upon to remedy this condition. In Saskatchewan, a proposal is calmly made that there should be paved roads provided, running from the United States boundary through the province to the northern edge of settlement, and that at least two other paved roads should be constructed right across the province from east to west,—a good thousand miles of paved highway at a cost of many millions of dollars.

And along with the demand for more roads, better roads, gravelled roads, oiled roads, paved roads, is coupled the demand for reduced license fees for automobiles, and the rebatement to municipalities of a goodly portion of the money now collected; in a word, for reduced taxation on the people. It is a peculiar situation. All Governments being urged to spend millions more and to collect very little less.

Yes, the West is impatient, and, at times, apt to be a bit inconsistent, too.

Leading Athletes

Find Minard's ideal for preventing stiff muscles and for lessening the pain of strained ligaments.

W. N. U. 1750

Would Eliminate Punctures

A new type of wheel having two tires, one within the other, said to be adaptable either to motor or trolley cars was exhibited recently. The outer tire is of solid rubber, the other, inside it, is of pneumatic and is incased in a steel frame next to the hub. This arrangement is said to take the strain from the outer tire while the inner one acts as a shock absorber. Punctures are also eliminated.

Courtesy opens many doors and lack of courtesy leaves them open.

Decrease In Fish Catch

Production In Canada During July Less Than Last July

A decrease in the total catch of sea fish on both Canadian coasts was recorded during July last as compared with July, 1927. In July last, the total catch amounted to 87,072,800 pounds, valued at \$2,712,332, as against 87,651,900 pounds valued at \$3,164,634 during July, 1927.

On the Pacific coast, the catch of halibut during the month under review was 3,608,200 pounds; while the catch of the preceding year was 3,712,400 pounds.

COMPLETELY RUN DOWN

Symptoms That the Blood Is Thin Should Not Be Neglected

Weak, run-down, lacking strength, energy and ambition, nervous, sleepless, poor appetite, digestion disturbed—these are the symptoms named by a great majority of people who have been benefited by the use of Dr. Williams' Pink Pills. Their great value in cases of this kind is shown by the statement of Mrs. James A. Tibbatts, formerly N.S., who says: "I was completely run down in health. My blood was thin and watery, and my nerves so bad that I did not sleep well at night. My appetite was poor and the least exertion left me weak and trembling. When I went out it would have a severe headache, and would have to lie down as soon as I got in the house. A friend advised me to try Dr. Williams' Pink Pills. I soon found they were helping me and by the time I had taken the sixth box I felt like a new woman, and have enjoyed good health ever since. For this reason I can highly recommend the pills to anyone run down or troubled with their nerves."

Why do Dr. Williams' Pink Pills help the nerves. Their main function is to enrich and increase the blood, and as the blood supplies the whole body, new life is given to the entire system. Better sleep, steady nerves, improved appetite, increased vigor—all these can be yours by taking Dr. Williams' Pink Pills. Begin them today. Sold by all medicine dealers, or by mail post paid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Pictures From Arctic Cruise

Having completed her annual cruise into the ice-filled waters of Baffin Straits to within 600 miles of the north pole, the S.S. Beothic, of the Canadian Government Arctic expedition of 1928, has returned safely. In her itinerary, the ship followed a course of more than 7,000 miles, frequently under conditions of extreme severity. This voyage was made in six weeks.

Like a Grip At the Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

Fruits of Peace River Country

Fruits, apples, raspberries and other fruits are being grown in the Peace River country, 200 miles north of Edmonton. Successful experiments in respect of these fruits were conducted at the Dominion Experimental Farm at Beaverlodge.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety and cling to and feed from the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Agriculturists Are Convinced

"I talked with at least one hundred farmers," said Senator Shipstead of the United States, after concluding a trip through Western Canada, "and I failed to find one who was in any way dissatisfied."

Corns are painful growths. Holloway's Corn Remover will remove them.

Montreal's Population

Montreal's population is 1,032,585, according to the estimate contained in the 1928-29 Montreal directory. Greater Montreal is estimated to have a total population of 1,176,461.

Building Model Farms

In Reclaimed Areas

Government Schemes To Stimulate Land Sales In Sumas, B.C.

To stimulate the sale of British Columbia Government land in the Sumas reclamation area, Provincial officials are about to establish three model farms, with buildings and complete equipment, to be sold as going concerns. The proposal, as outlined by Hon. E. D. Barrow, Minister of Agriculture, is that three complete farm units shall be created on choice Sumas land at Government expense. In every way they will be models of modern agricultural methods, with houses, barns and machinery. It is believed they will be sold without difficulty, but the main purpose is to attract farmers to the district and to encourage the establishment of first-class farms of similar character there.

Defective Vision In Children

Willie can now have a new alibi when he fails to pass his school examinations. According to W. A. Blocker, chairman of the convention committee for the Guild of Prescription Opticians of America, eyestrain and defective vision is retarding 2,100,000 school children in their studies.

Travelling By Airway

2,000 Passengers Fly Across English Channel in Five Weeks

Statistics just published show that Britain is rapidly becoming air-minded. Every week for the last five weeks more than 2,000 people have taken the once perilous air journey across the English Channel. This is an increase of more than 500 over the highest figure for last year.

During the busiest air week last year less than 1,500 people took advantage of the quick service from London to Paris. London now has air trips to 73 European cities. There are nine scheduled services each day to Paris, the first at 6 a.m. and the last at 4.30 in the afternoon.

More than 50 per cent. of the cross-channel passengers are women and they have included the extremes in age, babies travelling from time to time as well as the septuagenarian, octogenarian and once a man of 90.

Canada Offers Opportunities To Immigrants From Old Land Who Are Willing to Work

John Wheatley, Labor M.P. in the British Parliament, at a meeting in Glasgow, declared it was extremely cruel to send people to Canada for farm work, as they would be exploited and would "soon find themselves helpless and friendless in an ungenious land." It may be that this critic of the Dominion is convinced he is giving good advice and that he speaks the truth. Nevertheless he is wrong and facts may be advanced to prove his error. Mr. Wheatley chose a strange place to sound his warning for from Glasgow and other parts of Scotland have emigrated men who have been treated more than generously in this "ungenious land" that Mr. Wheatley attacks. John A. Macdonald left the streets of Glasgow with his parents and while yet a young man became Premier of the Dominion of Canada, the first prime minister after Confederation. Macdonald made all his progress in the country of his adoption; he had brought nothing from Scotland. Canada was generous to him. In the same period Alexander Mackenzie emigrated from the same Scotland and became the second premier of the Dominion. For instance, there was Donald A. Smith, a Hudson's Bay Company clerk, who played a tremendous part in the life of the Northwest and later on of the East, and eventually went to London as Canada's representative there. He worked hard, grew rich, served the country well in an hour of need, was elected to Legislatures in the West and to Parliament from Selkirk and Montreal, and, in fact, was honored in politics, industry and social life. The Dominion was not ungenerous to him, although for a generation he was in what was then a wilderness. From England and Ireland likewise came men without any other wealth than their strong bodies and sound minds who made houses and names for themselves by starting in many instances on the land that John Wheatley, M.P., decries. Their careers are a contradiction of his uncalled for words.

Critics like Mr. Wheatley may say that conditions are less favorable today than in the past, but again they can be answered. Hon. Charles Dunning, Hon. Robert Forke and Hon. Peter Hennan, from England, Scotland and Ireland, respectively, are outstanding examples of the opportunities Canada offers to men of intelligence who enter her portals with the intention of working hard and making progress. The opportunities were never greater and the newcomers will not find themselves helpless and friendless, contrary to what Mr. Wheatley declares. — Montreal Gazette.

We have never known a sensible purveyor of happiness who ever secured up what his car cost him in the course of a year.

The man who used to rock the boat now gets more fun out of doing it on a slippery road.

Oak is stronger than ash. The breaking point of the former is 220 pounds, that of ash 175.

Coyote Fur Farms

Prairie Wolf Can Be Raised In Captivity and Fur Sold At Good Profit

Another animal has been added to the growing list of those raised under domestic conditions for their fur. Two young boys living 90 miles northwest of Edmonton started a coyote farm in 1927 by digging young coyotes out of the ground and confining them in a pen. They got 140 young animals and when the skins were mature sold them for \$12.00 each.

The coyote is sometimes spoken of as the prairie wolf, but has little in common with the real wolf. He will not attack human beings or other animals; indeed, he had attained no distinction at all until it was discovered that he could be raised in captivity and his fur sold at a good profit.

Winnipeg Newspaper Union

FEMININE LOVELINESS

An adorable sheer printed crepe frock at a comparatively small cost, in simple styling, with molded bodice, swathed girldle and youthful box-plates at front of skirt. The soft scarf collar with bow ties gives added charm. Style No. 242 is designed in sizes 18, 20 years, 36, 38, 40 and 42 inches bust. It is equally smart made of printed silk crepe, printed duinty, crepe satin, crepe Roman, printed chiffon voile, canton-faille crepe, georgette crepe, and crepe de chine. Made in a jiffy! See small views! Pattern price 25 cents in stamps or coin (coin preferred).

Western Canada Tobacco

Leaf Of High Grade Quality Can Be Grown In The West

Any possibility of a tobacco famine seems to be averted by the discovery that tobacco can be grown successfully on the plains of Western Canada, already famous as the world's greatest source of wheat supply.

Excellent results have been obtained on experimental plots in Southern Manitoba and Southern Alberta. The leaf produced in the West shows top-notch yield and excellent quality.

The expansion of the industry in the Okanagan Valley of British Columbia last year was phenomenal. The commercial production leaped from 47,000 pounds of cured leaf in 1926 to 2,000,000 pounds in 1927.

In the whole of Canada the acreage devoted to tobacco culture increased from 23,932 acres in 1922 to 44,028 acres in 1927. The annual yield increased from 21,000,000 pounds to 43,000,000 pounds, and the value of the crop from \$3,518,000 to approximately \$10,000,000. During the same five years the annual export of leaf increased from 1,000,000 pounds to over 6,000,000 pounds.

The Orientals have a god for every ailment, even for mumps and gout.

Canada saw the birth of the moon telephone, at Brantford, in 1874.

Great Loss of Life As Well As Property Loss Results From Explosions Caused By Dust

You would not expect a bottle of milk or a cork to explode, would you? And it wouldn't so long as it stays a bottle of milk or a cork, but if it becomes dry milk dust or fine cork dust floating in the air it most certainly will explode upon any reasonable provocation, writes H. H. Shildon, M.A., Ph.D., Professor of Physics, New York University.

Perhaps you might be somewhat timid about putting a match to a few quarts of nitroglycerine, and yet we are told (the author hasn't tried it), that if it is an open vessel, so that the gas can escape, it will burn rapidly, but will not explode. It takes a sudden jar to cause it to explode.

You might also be surprised that a barn standing in three feet of water as the result of a flood would suddenly of its own accord catch fire and burn to the water level. And yet that, too, has happened. These may sound like occurrences in some distorted land where nothing happens as we expect, but such occurrences are actually fairly common. How does it all happen?

There are two kinds of explosions which are commonly classed as physical and chemical. A physical explosion is of the type of a "blow-out" of an automobile tire. The explosion of a steam boiler or of a tank of compressed gas is similar. A large quantity of gas under pressure is suddenly released.

A chemical explosion is the same as a fire, but takes place more rapidly. In this case material combines with oxygen, which it may obtain from the air, to form a gas and usually an ash. If the gas is formed slowly it will escape as it is formed, but if it is formed rapidly it will destroy all its inclosures in the attempt to expand. The former is a fire, but the latter is an explosion.

If we put up such signs as "glyceryl nitrate," "cellulose nitrate," "picric acid," "trinitrophenol," every workman would have all due respect, even though he had not the slightest idea what the substances might be. But if the signs say "flour," "metallic dust," "milk dust," "chocolate dust," "wood dust," "sugar" or "rubber dust," the workman sees that he is familiar with these things and would light a match for smoking without hesitation.

The danger lies in the fact that scattered through the air as dust each particle has in its neighborhood plenty of oxygen for rapid combination or explosion. But do these things ever happen?

Dr. David J. Price, of the Bureau of Chemistry and Soils, in an address at the University of Pennsylvania, said: The research work of the Bureau of Chemistry and Soils indicates that, when mixed with air in proper proportions, combustible dusts of practically all types can be readily ignited by external sources of heat or flame. The bureau has obtained records of more than 300 of these explosions. In 78 dust explosions 498 persons were killed, and in 106 explosions, 875 were injured. In 144 cases the property loss amounted to \$39,706,108, an average of nearly \$246,590 for each explosion. The economic importance of this problem can be more readily appreciated when it is realized that at least 28,000 industrial plants, employing over 1,324,000 persons and manufacturing products of an annual value in excess of \$10,000,000,000, are subject to the hazard of dust explosions.

Of the cases studied by the bureau one was due to pyroxylin lacquer on automobile bodies, eleven were sulphur dust, four hard rubber dust, sixteen starch, nine sugar, twenty-seven wood dust, six cork, two aluminum dust, six fertilizer, three spice, two pitch dust, one resin, two powdered milk, two chocolate and cocoa, two celluloid and three cotton dust. Nearly all harmless sounding names.

The causes of these explosions were not so varied as one might expect. The majority resulted from sparks due to operation of machines, caused by hard foreign material getting into the grinding equipment. Running close second to this cause was sparks from static electricity caused by belt running over pulleys and so on. Occasionally the cause was a direct open flame. A broken electric lamp bulb caused a few more, and in one case overheated bearings were responsible.

The cause of "spontaneous combustion" is the same as that of explosions, but in this case the oxidation begins slowly. Having begun, it produces heat and this, raising the temperature of the surroundings, increases the rate of oxidation. And so the process accelerates until fire occurs. This is very common in barns of hay, alfalfa, etc., the rate being amounting to \$50,000,000 annually.

An interesting case occurred near Middlesex, Vt., after the flood last year. The water rose to a height of seventeen feet in a barn containing about fifty tons of hay. A day after the flood had receded less considerable steaming was noticed. The third day a charred odor was apparent, and that afternoon the barn burned. The hay still stood in three feet of water when the barn burned. It is a curious case of a fire caused by water, and due to the fact that water contains oxygen.

Victorious Canadian Athletes Return Home

The first contingent of the Canadian Olympic Games party received a tremendous welcome when they returned to Canada on the White Star liner Laurentic. They were guests at civic receptions in Montreal and Toronto, while individual cities planned special celebrations in honor of their individual members of the team. The above photographs show, top, the group on board the Laurentic in which can be seen, fourth from the left, standing, Mrs. Joe Wright, and, extreme right, Joe Wright, Sr., parents of Joe Wright, Jr., who won the Diamond Sculls at Henley. Joe Wright is seen in the centre of the back row, eighth from the right. Fourth from the right standing is Lou Scholtes,

winner of the Diamond Sculls in 1904, who went to greet young Joe Wright. Underneath the group, on the left, is Joe Wright, Jr.; on the right is Ethel Catherwood, of Saskatoon and Toronto, winner of the high jump at Amsterdam, where she created a world's record. The four girls are members of the team which won the 400 metres relay event and created a new world record. From left to right they are: Myrtle Cook, Jane Bell, Ethel Smith, and F. Rosenfeld. The bottom photograph shows young Joe Wright, displaying his trophies won at Henley to his mother. In his left hand he has the gold cup which is his permanent prize, and in his right hand he has the miniature Sculls, which he holds for one year.

WORLD HAPPENINGS BRIEFLY TOLD

Reductions ranging from a nickel to 50 cents a bottle are effective in Scotchman liquor prices, according to the price list issued by the Scotchman liquor board.

Attempts are being made to organize a meeting of countries directly interested in evacuation of the Rhineland. It is understood in League of Nations circles.

Only one-fifth of an inch of rain fell in Vancouver, during the month of August, making it the driest August since the taking of records commenced in 1905.

The Canadian Mail Contractors' Association in convention at Toronto, decided to urge abolition of the contract system and the institution of a salary basis of \$70 per mile per year.

The New South Wales cabinet has approved the proposal of the state agricultural department to import high quality Aberdeen Angus cattle from Canada as part of a scheme to improve the export beef trade, particularly heavy beef.

The U.S. department of agriculture has lifted the embargo on dairy products passing through Montreal. The embargo was placed in effect during a typhoid fever outbreak in the Canadian city. It originally covered 200 miles but has been decreased from time to time.

A new list of broadcasting stations in Canada has just been issued by the Radio Branch, Department of Marine and Fisheries. A careful reading shows that there are four new licenses, while one station has dropped its license, bringing the total number of licenses in Canada to seventy-six. This list supplements the list issued late in June.

Little things console us because most of our affections are little ones.

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

Farmers' Marketing Tour

Canadian National Railway Tour
To Great Britain and
Denmark, 1928

(Continued.)

It was not far from Craigie Main to Hobland, the home of Mr. Thomas Barr, the Ayrshire cattle breeder, where, incidentally, we learned that our leader, Mr. Arkell, had spent part of his honeymoon.

It is safe to say that none of us had ever seen a finer herd than that which was shown to us, fine, big, heavy, deep-milking cows, every one a picture of what an Ayrshire ought to be. The 75 cows in milk average between 800 and 1,000 gallons, with one yielding 1,800 gallons, testing 4 per cent. Most of these cows were daughters of champion bulls. Mr. Barr does a great deal of business in Canada, and at this year's Royal show a large proportion of winners was from stock of his breeding.

In the opinion of the dairyman members of our party, Mr. Barr's byres were the best they had seen. Part of the barns are floored with concrete, part with brick. Mr. Barr maintaining that brick flooring is healthier in winter and results in the avoidance of trouble in the knees and joints of the cattle. It is interesting to note that some of the fields on the farm have been in grass 70 years.

Mr. Montgomerie's Lesnessock farm at Ochiltree which we next visited, is best known to Canadians because its name is a prefix to the names of many animals which have helped to make Canadian Ayrshire history. This farm is not far from Macaulay, where the poet Burns had a farm of his own.

Last year 100 Ayrshires were shipped to Canada by Mr. Montgomerie. His herd now supplies tuberculin-tested milk by contract to the hospitals belonging to the Municipality of Glasgow, testing 4 per cent, and running up to 4.6 per cent. This herd provides one of the most outstanding examples of grading up milk and butter fat yield. In 1926 he had 40 cows averaging 554 gallons of 3.69 per cent. butter fat over 36 weeks. In 1927, 52 cows averaged 720 gallons of 3.9 per cent. butter fat over 39 weeks, and in 1927, 52 cows averaged 920 gallons of 4.19 per cent. fat over 44 weeks.

It was a delight to see his fine herd of milking cows and the barns and byres which presented an object lesson in clean milk production. An interesting development was the "dorming" of the calves of Lesnessock, a step which is being watched closely by other breeders. Mr. Montgomerie applies a preparation to the calves when they are a few days old which prevents the horns from growing.

The farm of Lt.-Col. Norman Kennedy, D.S.O., breeder of the famous Doonholm herd of Aberdeen-Angus cattle, lies in the very heart of the Burns Country, on the "Bank and Braes of Bonnie Doon," one mile from the poet's birthplace at Alloway. It was a revelation to see selected numbers of this wonderful herd which has such an enviable record of high awards to its credit at the shows of the Royal Agricultural Society of England, the Highland and Agricultural Society of Scotland; Smithfield, Edinburgh and Perth Spring shows and sales. Outstandingly interesting as were the animals themselves, they were rendered doubly so by the able exposition of the points of the Aberdeen-Angus breed by Mr. James Cameron, formerly agricultural editor of the Glasgow Herald and one of the foremost judges in Scotland, besides having judged at Smithfield and in the Argentine.

We were not allowed to leave Doonholm until Lt.-Col. and Mrs. Kennedy had extended to us the hospitality of their beautiful home on the banks of the Doon, where in the fine grounds we were shown the five trees which were planted by the father of Robert Burns as gardener to the estate.

Interested as we were in these three famous farms, we were glad that opportunity permitted us to visit, if only for a short while, the home of Robert Burns. The wee clay cottage remains almost as it was in

ECZEMA BROKE OUT IN PIMPLES

Had to Keep Hands Out of
Water, Cuticura Heals.

"Eczema started with an irritation and soreness between my fingers. Later it broke out in small pimples which were red and full of water. I had to keep my hands out of water, and could not do my regular work. The itching and burning certainly kept me awake at night."

"A neighbor recommended Cuticura Soap and Ointment so I sent for a free sample. After using it I discovered the trouble was disappearing so I purchased more, and my hands were perfect after using one cake of Cuticura Soap and half box of Cuticura Ointment." (Signed) Miss Mollie Hanna, Oriskany, N.Y., Oct. 10, 1927.

Use Cuticura to heal skin troubles. Get free booklet, "Eczema Cures," from Dept., "Cuticura Sales Division," Price, Soap, 10¢; Ointment, 25¢. Send for free booklet.

Cuticura Soap, 25¢; Ointment, 50¢.

Burns' day, even to the furnishings—the kitchen table, the grandfather clock, the straight-backed wooden chairs, the plate rack and china, the hangings and the bed where the poet was born, the barn adjoining the cattle stalls. A small home and a humble one, but to be entered with reverence by all who believe in the dignity of labour and the independence of man. Behind the cottage we visited the museum of Burns relics, the Auld Kirk where Tam o' Shanter watched the witches dance, and not far distant the "Auld Brig o' Doon," where his mare Meg lost her tail, and the Burns Monument. Our excursion to Glasgow gave us little time to see the city itself, although all of us took opportunity to stroll along the famous Sauchiehall Street, Broad, with handsome shops on both sides; this fine thoroughfare is full of interest, and mirrors in its bustle and activity the vigorous spirit of this great industrial city.

Canada's trade connection with Glasgow is close. Glasgow has always favoured the removal of the embargo on the export of Canadian cattle, and the proportion of cattle imported out for stores was greater than elsewhere. After we learned along with the rest of Scotland has also formed a high opinion of Canada. It was with special interest, therefore, that we visited the Glasgow Corporation's Marketland Wharf at which cattle and pigs are landed. There are no finer facilities in the British Isles. The accommodation is for 4,600 head, and includes three sales rings, a large number of killing booths and extensive cold storage for carcasses before removal direct to buyers, butchers' shops or to the meat markets in the east end of the city.

And now, as guests of the Corporation of Glasgow, we were to attend our last official luncheon in Great Britain. We took our seats in the great banqueting hall, the Lord Provost, Sir David Mason presiding. (To Be Continued.)

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, be it of any action, while fully effective is mild.

Record Breaking Air Mail Cargo

18,000 lbs. Of Mail Carried By Fleet
A fleet of 18 airplanes, each laden with a half a ton of mail, landed at the municipal airport at Chicago recently and established what is believed to be a new record for shipments by air mail. The fleet, chartered by a Lansing, Mich., manufacturing firm which sent out almost 350,000 pieces of mail in their record-breaking cargo, carried approximately 18,000 pounds.

The Lansing Company's postage on the shipment amounted to more than \$13,000.

Bicycles Popular In Holland

Bicycles are popular in Holland, where there is no tax on every 2½ inhabitants. This is attributed to the fact that there are practically no hills in Holland. The importance of the machine is recognized by the authorities in that they provide separate bicycle roads running parallel to the other roads.

Helping the Doctor

Dr. Charles H. Mayo, now tells in complete detail just exactly how to run a newspaper and the Chicago Herald is thinking of writing a two-column editorial on the technique of removing the gall bladder, in case he'd like to know.

Lodger: "Did you ever see anything so unsteady as the weather?" Landlady: "Well, there's your bill."

SUNDAY SCHOOL LESSON

SEPTEMBER 16

PAUL WRITES TO HIS FRIENDS
IN CORINTH

Golden Text: "Behold, how good and how pleasant it is for brethren to dwell together in unity!"—Psalm 133:1.

Lesson: 1 Corinthians 1-4.
Devotional Reading: Ephesians 3:1-6.

Explanation and Comments

Exhortation To Unity, 1 Corinthians 1:10-13.—Through members of the household of Chloe, Paul learned that there were contentions among the members of the church at Corinth. It has been inferred that Chloe was a business woman of Ephesus who had sent slaves to Corinth in the purchase of olive oil for her trade. After the return of the latter they had brought back this news to Paul, who was then at Ephesus. If it had belonged to Corinth, it is argued, Paul would hardly have exposed them to reprisals by the disciples in his letter. After his salutation and words of thanksgiving (verses 1-9), Paul takes up this report and appeals to his readers to be of one mind. "I beseech you, brethren, through the name of our Lord Jesus," he writes—a name which among the reminder to them of their oneness as His disciples— "let ye all speak the same thing; that you agree in calling, and your Leader, and that there be no divisions among you."

A sad remedy of bit counsel this for our day! It is said that in one of the great cities of England a quarrel arose among the firemen, and at the first fire which they were to fight instead of putting out the flames they turned the hose on one another. This is a picture of what many Christian groups are doing today. The remedy is given by the apostle Paul: "Be of one mind."

If the litigious knew the taste of friendship with the Friend, Think you that their life would waste.

In quarrels without end?

"That ye be preferred together in the same mind and in the same judgment," continues Paul. "Nothing doth so much keep men out of the church and drive men out of the church, as breach of unity." Bacon.

There were three parties in the church at Corinth. The first, which were called by the name of the leader which each admired the most, was that of Paul and his converts, the adherents of Paul, those of Apollos and those of Cephas, or Peter. Then there was the party of Satan, which may have arisen as a protest against calling any man the leader of the church. To Paul's question— "Is Christ made a party to the whole instead of the whole?" By this we can see how he expressed his thought of degrading Christ to the level of his human messengers. "Is Paul crucified for you?" Or were ye baptized into the name of Paul?" he continues. By the crucifixion of Christ they were saved, by baptism they were dedicated to Christ's service; it was inconceivable that they should put others on a level with Christ.

"One may say, I am of Paul; and let neither forget that both Paul and Apollos are disciples of Christ, and remember the words of Christ Himself: 'I pray for them, that they may be one, as thou, Father, art in Me, and I in Thee, that they may be one in us.'"

The Oil Of The People.—Many oils have come and gone, but Dr. Thomas' Eucalypti Extract has remained its position and increased its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Troubles have benefited by it and would use no other preparation.

Alberta Elevator Construction

250 New Elevators Have Been Built In Province This Year

Approximately 250 new elevators have been constructed throughout Alberta this year, it is estimated by local grain men. The total capacity of these elevators would be about 18,000,000 bushels. It was stated. Complete figures for elevator construction in the province were not available, but grain men stated that extension of facilities had been progressing rapidly in all parts of Alberta. The capacity of the elevators varied from 35,000 bushels to 140,000 bushels. The Alberta Wheat Pool alone has 110 more elevators this year than in 1927 and practically all the public grain elevator companies have increased their storage capacity.

British Columbia Exporting Eggs

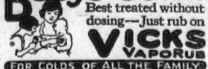

Three years ago British Columbia was importing eggs. This year that province has already exported over 200 carloads.

Veterinaries use Minard's Liniment.

The flat, stale taste which you sometimes find in tea may be due to the package it is put up in. Red Rose Tea is of such fine quality that no chances are taken. It is packed in aluminum, the only material that gives complete protection against dust, dampness and deterioration.

FRASER RIVER GOLD

After more than half a century of neglect, the gold gold-bearing bars of the Fraser River are being extensively prospected again and mining men predict a new era of intensive development on this famous mineral-rich stream. Not since the early sixties has the Fraser been "prospected" so thoroughly as now.

Everybody Welcome

Nervous Curate (giving out notices): "The vicar will continue his pleasant series of Friday evening addresses in the parish hall, and the subject next Friday will be Hell. The vicar hopes to see you all there. The collection will be for the new heating apparatus."

DIARRHEA
Was So Bad
Child Passed Blood

Mrs. Harry Nesbitt, R. R. No. 2, Shannon, N.B., writes:—"Last Fall my little boy took very bad with diarrhea and before I knew it he was passing blood. I went to our medicine case and gave him a dose of

D'FOWLER'S
EXT-OF
WILD
STRAWBERRY

and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken six doses he was like a different child."

This wonderful blood complaint remedy has been on the market for over 50 years; just up only by the R. M. M. Co., Limited, Toronto, Ont.

W. N. U. 1750

RECORD CROP IS BEING GARNERED IN THE WEST

Winnipeg.—The rush to move what is estimated as the largest wheat crop in the history of the Canadian West is on in earnest with many thousands of bushels of grain being marketed daily. The rush is earlier than ever before, railway officials said.

With threshing reported general all over the West, cutting completed in Manitoba, and more rolling stock and general equipment massed at strategic points on the prairies than ever before, indications are that the whole operation of taking off the crop and marketing it will be completed in record time.

Cutting is reported as practically completed in Saskatchewan and well advanced in Alberta. Interior elevators are swept clean and ready for the pouring-in of the new grain. Stocks in the lake head terminals have been reduced to 4,531,000 bushels.

Reports of wheat yields are favorable on the whole and at most points the grading is high.

U.S. Fishing Boat Seized

American Boats Detained By Customs Patrol At Coast

Victoria, B.C.—Seized by H.M.C.S. Telegraph and the Canadian customs patrol boat Despatcher while in a cove on the west coast of Vancouver Island near Clayoquot, two United States fishing vessels, the Marmot from Tacoma, and the Chief Seattle, from Seattle, were brought into Victoria harbor recently.

The two boats and the two occupants of each were handed over to the collector of customs for detention, while the facts of the case were wired to the Federal Department of Marine and Fisheries at Ottawa.

The two fishing crafts were found in Canadian waters recently, and although they were not fishing at the time, things looked suspicious and they were seized. The occupants said that they had taken shelter in the cove from a storm which they thought was approaching.

Drilling For Oil At Unity

Unity, Sask.—Unity Valley No. 2 well shows oil sands in tailing from nine inch casing at depth of 2,160 feet. Sand from tailings smells plainly of crude petroleum. A test with chloroform shows good oil extracted with no water to light, and appearances are all favorable. Drilling is continuing carefully. Gas is showing as in former well. Expect oil soon.

To Seek Noble Craft

Rome.—The dirigible No. 5, a sister ship of lost Italia, is being prepared for a final attempt to locate those of the Italia's crew last seen with the gas bag, says Giornale d'Italia. The dirigible will have Maibach motors and in a few technical details will differ from its ill-fated predecessor. It is said General Nobile himself is supervising the work.

Driver Did Not Stop

St. Louis, Mo.—A hit-skip motorist whose automobile struck and killed Jeremiah Horan, allowed his body to ride on the front bumper of his car for 50 feet and then fell under the automobile, where it was run over by the wheels of the car, witnesses said. The driver of the car did not hesitate.

Egypt Will Sign Pact

Cairo, Egypt.—The newspaper Al Saieah says the Egyptian Government has handed the American charge deaffaires its reply to the invitations to adhere to the Kellogg-Briand pact renouncing war, the reply being so worded as to safeguard the full rights of Egypt.

Canadian Is Appointed

Geneva.—Hon. Philippe Roy, first Canadian Minister to France, was appointed official reporter on the question of settlement of Bulgarian refugees and the Bulgarian stabilization loan, at a session of the League of Nations Assembly.

W. N. U. 1750

Distribution In October

Saskatchewan Pool Money Will Be Paid Next Week

Regina.—Although a despatch from Calgary stated that \$1,000,000 net profits would be distributed to Alberta Pool members within the next 10 days, D. McRae, manager of the Saskatchewan Pool Elevators, states that distribution to Saskatchewan members will not take place until next month.

Stating that each province determined on its particular policy, Mr. McRae said: "Our policy for this is not announced until the financial figures are complete." It will be 10 days or two weeks before the Regina office will have a statement. The statement has to be submitted to the delegates of the Pool before it is made public.

Handwriting By Telegraph

Facsimile Messages Now Despatched Under New System

New York.—A telegraph service whereby a message is delivered in facsimile characters was inaugurated recently by the Postal Telegraph and Cable Company.

By this new system a person may send a message on a blank in New York and in the same time that it takes to deliver a regular telegram the same scrawled message can be delivered in various parts of the country through a telephoto process.

The cost of this new service is one and one half times the ordinary telegraph service.

The same company also introduced recently a photograph service whereby pictures may be transmitted.

Is Not Resigning Post

Sir Austen Chamberlain Expects To Resume Work In November

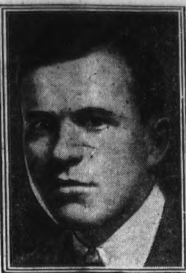

London, Eng.—Following alarming reports regarding the health of Sir Austen Chamberlain, foreign secretary, it is learned in medical and other well informed quarters that there is no reason to suppose that the minister will not return from his trip to the West Indies and North America in good health.

An attack of bronchial pneumonia following strenuous work during the past year left Sir Austen in a weakened condition, but it is believed that rest and change will restore him to health and will enable him to resume his duties on his return in November.

Purchase Northern Mine

The Pac. Man.—Colonel Orbelain, of New York, representing certain mining interests in the American city, has purchased the Pat, Pine, Neopap and other groups of claims near Athapapukut at Sourdough Bay from the Baker Patton interests for a sum which is reported to exceed \$500,000.

Receives Ottawa Appointment

Prof. Lester B. Pearson, of the University of Toronto, who has been appointed a first secretary of the department of external affairs at Ottawa, Mr. Pearson is a professor of modern history. He coached one of the university football squads for several years and was graduate coach of the hockey team last season. He is a graduate of variety and attended Oxford for a year.

Given Command At Coast

Major Ball Has Been Promoted To Rank Of Lieutenant-Colonel

Ottawa.—Announcement was made by the Department of National Defence that Major C. E. Ball has been promoted to the rank of lieutenant-colonel and to command of the 11th machine gun battalion in Vancouver. He will succeed Lieut.-Col. H. T. Logan, who has been transferred to the reserve of officers. Lieut.-Col. Ball served with the 11th Battalion, C.E.F. in France and Belgium, being wounded and invalided home in November, 1917.

Explorer Seeks Clemency

Dr. Cook Asks President Coolidge To Shorten Sentence

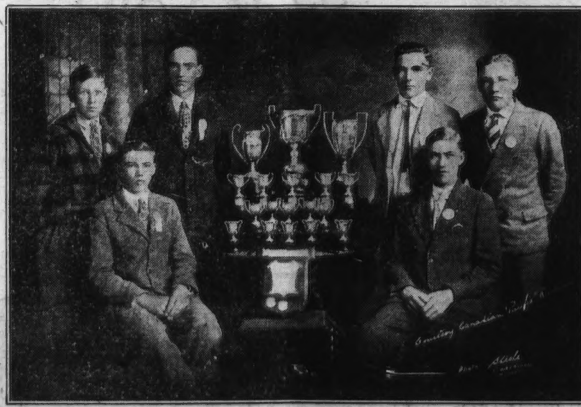

Fort Worth, Tex.—Dr. Frederick A. Cook, Arctic explorer and oil promoter, now serving a 14-year and nine months sentence in the United States prison, Leavenworth, recently sent an appeal for executive clemency to President Coolidge.

The petition, prepared by Dr. Cook from his cell at Leavenworth, asks that the president commute the sentence to the time already served and remit fine and costs assessed in United States district court.

Zeppelin Ready To Leave

Friedrichshafen, Germany.—Director Hugo Eckener, of the Zeppelin works announced that the newest and highest dirigible, "Count Zeppelin," would leave for the United States on October 12, anniversary of the departure of the Los Angeles.

COMPETITION IN FIELD CROPS

The village of Bountiful, Saskatchewan, on the Moose Jaw-Macklin line of the Canadian Pacific Railway came into prominence at the Saskatoon Exhibition this year by winning a majority of the trophies offered for competition in field crops. The cups won by the Bountiful boys were those donated by Quaker Oats, John East, Butler Byers, and the Kiwanis Shield. The names of the boys are, reading from left to right—standing, Howard Sibbald, Harold Smith, John Glickrist, Howard McPhadden, reserve grand aggregate winner; seated, Roy Matheson and John McCay.

Interested In Wheat Pool

British Government Might Buy Wheat From Pool If Ramsay MacDonald Becomes Premier

Winnipeg.—If Rt. Hon. J. Ramsay MacDonald again becomes premier of Great Britain, his government may buy its wheat requirements from the wheat pool.

Mr. MacDonald on arrival in Winnipeg had lunch with representatives of the pool. It is understood he discussed the question, in which he has shown a lively interest. He is anxious to know at first hand the prospects of such a step eventually being taken.

The question of direct relations between the British Government and Canadian co-operative marketing agencies has been increasingly discussed in recent years. It is favored by many as an important step in Empire relations, but on the other hand is looked at askance in some quarters as savouring too much of socialism.

Plane At Saskatoon Seized By Mounties

Pilot Charged With Failing To Comply With Regulations

Saskatoon, Sask.—Royal Canadian Mounted Police seized an aeroplane operated in Saskatchewan, with Saskatoon as a base, by Norman Cherry, of the Cherry Airways, Ltd.

The plane was seized by the police acting upon instructions from the Civil Aviation Branch of the Department of National Defence. It is understood that Cherry had failed to comply with certain regulations governing the operation of a plane for commercial aviation in this province.

Cherry arrived here from the United States this spring and has been operating throughout the west.

Famous Watch Maker Dead

Robert Ingersoll, Originator Of The Dollar Watch, Passes Away At Denver Sanatorium

Denver, Colo.—Robert H. Ingersoll, watch manufacturer and originator of the well-known dollar watch, died here at a sanatorium where he had been a patient since June 17.

Mr. Ingersoll was 69 years old and was born on a mortgaged farm in Michigan. Ingersoll and his brother Charles, capitalized Ingersoll's idea that watches could be made cheaply. The firm of Robert M. Ingersoll and Brother manufactured and sold more than 70,000,000 dollar watches.

Industrial Disputes

Ottawa.—Time lost in industrial disputes in July, 1928, was slightly less than during June, 1928, but almost double that during July, 1927. Eighteen disputes were in existence at some time or other during the month, involving 2,449 work-people and resulting in a loss of working time of 23,793 days.

ENTRANTS FAIL TO FINISH COURSE IN WRIGLEY SWIM

Lake Shore, Toronto.—Lake Ontario was victor in the third Wrigley's marathon swim. Its chilly waters saw the defeat of some of the world's most famous swimmers and some of the 199 starters had sufficient stamina to finish the 15-mile struggle.

Georges Michel, French conqueror of the English Channel, who last year finished second in the 21-mile marathon, was taken from the water at 10:12 p.m., after completing 12 1/2 miles of the course in 11 hours, 12 minutes.

He had been the sole survivor since 6:42 p.m. when Ernest Vierkötter, of Germany, the 1927 champion, and Louis I. Mathias, of Long Island, N.Y., had fallen victims to the cold.

Vierkötter was forced out after leading most of the way and completing two-thirds of the course. Michel was then the only swimmer left in the race.

The Frenchman, his flagging energy being constantly renewed by stimulants which consisted mostly of brandy, was swimming slowly and unsteadily in the glare of floodlights early in the night.

At 8:45 p.m., nearly ten hours after the 15-mile race started, the French swimmer had about four miles to go.

Nova Scotia Legislature Has Been Dissolved

Provincial Election Is Set For October First

Halifax, N.S.—The Nova Scotia Legislature has been dissolved. This was announced by Premier E. N. Rhodes, here, following a session of the executive council.

A provincial general election is set for October 1, with nomination day on September 24.

Coinciding with the announcement of dissolution, Premier Rhodes, who leads a Conservative administration, issued his manifesto to the electors. In it the premier reviews the activities of his government, which assumed office following the election of June, 1928. He compares the present condition of Nova Scotia with that in which the province found itself prior to his taking over.

It was during Premier Rhodes' regime that the Legislative Council was abolished, and the manifesto is introduced by a reference to this.

Find Post For McAndrews

Washington.—William McAndrews, former superintendent of Chicago schools, who was forced out by Mayor William Hale Thompson, is being considered, among others, for the post of United States commissioner of education. It is learned at the interior department. Dr. J. J. Tigert, of Tennessee, recently resigned.

Welcome For Rockford Flyers

Rockford, Ill.—Mayor Beft Allen, of Rockford, met with members of the chamber of commerce and the "Greater Rockford" flight committee here recently to frame plans for an elaborate welcome to Bert Hassell and Parker Cramer, when the two return from Greenland.

Harvested Valuable Crop

Bellvedere, S.D.—George Whyte, farmer living near here, claims to have harvested crops valued at three times the price he paid for his farm. Whyte sold his fax crop which yielded 10 bushels an acre for \$3,000. He paid \$1,000 for his 160 acre farm.

Would Ban Liquor

Geneva.—Women of five Northern European states, Finland, Sweden, Denmark, Estonia and Latvia, have founded a "Union for Alcohol-free Culture," by which they hope to suppress the use of alcohol in homes and at school gatherings.

Girl Sent Away Fined

Glasgow.—Janetta and Margaret Doherty, of Montreal, Que., and formerly of Hamilton, Lanarkshire, were fined £4 each or 20 days' imprisonment when they appeared in court here charged with stowing away on the liner Letitia.

Largest Passenger Engine in British Empire

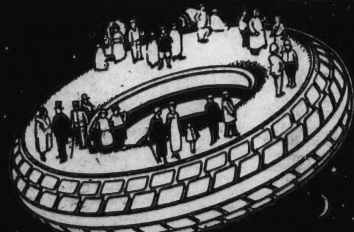

When the largest passenger lo-
comotive in the British Empire
emerged from Angus Shops under
her own steam, close to eight
thousand employees, most of
whom had contributed something
to her creation, stopped to cheer
as her throttle gently opened for
the first time, she moved slowly
forward. She is a triumph of
Canadian design and engineering
craftsmanship; a graceful me-
chanism nearly one hundred feet
long, with a tractive effort of
60,800 pounds, equal to 3,685 horses
power.

The new K-1-A* Class locomotive
has been built from designs
originated in the motive power
department of the Canadian Pa-
cific Railway in the company's own
shops by its own employees. Two
of these engines have been con-
structed and they will first be
operated on the Montreal-Toronto
run.

Although its weight, 494,900
pounds, is greater than that of
any other passenger engine in
Canada, the extensive use of Cana-
dian nickel steel parts has re-
duced it to a minimum, and the
high ratio of tractive power to
weight is a notable feature of the
new engine. Other features are
a one-piece cast steel locomotive
bed; a tender with a water bot-
tom underframe; boiler pressure
of 275 pounds, the highest of any
locomotive in Canada; and a
length of engine and tender of 97
feet 5 inches. There are eight
pairs of wheels, a four-wheel
leading truck, eight drivers, and a
four-wheel trailing truck. The
wheels have a diameter of 75
inches and the cast nickel steel
cylinders are 25½ inches by 30
inches. The coal capacity is 18½
tons, and water capacity 12,000
gallons. A mechanical stoker
considerably lightens the duties of
the fireman.

The new design aimed at lar-
gely increased power, reduction of
weight and elimination of parts.
The result has shown that Cana-
dian technical skill and workman-
ship is equal to the task of put-
ting a fully equipped engine of
the best type under its own power,
and that the Canadian Pacific
Angus shops, the second largest
on the continent, are capable of
vising successfully with recog-
nized engine building plants any-
where in the world.

Wheat Pool News.

The Alberta Pool Elevators have announced the distribution of approximately one million dollars excess earnings from 1931 year's operations. This sum will be distributed to Pool members who patronised their own facilities and on the following basis—

2c per bu. for wheat shipped over platform to Pool terminals.

3½c. bu. on wheat special binned in Pool elevators.

4c bu. on wheat delivered to Pool elevators on the cash ticket basis.

Checks covering the distribution will be mailed in a short time.

This sum is available from excess earnings of the Pool elevator system, which included the operation of the country and terminal elevators after 6 p.c. interest had been provided for on elevator reserve reductions; the provision of 5 p.c. for depreciation; the payment of all operation expenses, and the setting up of an allowance for certain contingencies.

Stony Plain and District.

Wong Chee left Monday for Hong Kong.

Mr A. Alt arrived home on Saturday night from a trip to Duluth.

Messrs Franklin K Clarke and W. W. Wooterspoon made a motor trip from Jasper on Monday, leaving that place at 4:30 a.m. and arriving in Stony at 9 in the evening. After getting refreshments, they continued their trip to Edmonton.

Miss Christine Miller is at present in an Edmonton hospital, recovering from an operation for appendicitis.

Jack Messenger, Entwistle, was a business visitor in Stony on Monday.

Paul Werner had as guests yesterday N. S. Maguire, of the C.N.R. colonisation dept.; H. Jahn, Edmonton; and Dr. Hamilton of the N.G.L., Berlin, Germany.

R. C. services will be held in the Town Hall on Sunday next at 9 a.m.

Attention is drawn to the announcement of the Cash Store, that it will be closed on Saturday next, the 15th.

The Nick Bauer outfit has purchased a threshing outfit.

7½ is a good return on your money; so is a subscription to your local paper.

Threshing Again.

Threshers have again resumed work, after the setback of Thursday night's rain storm, and the more experienced farmers are insisting that stocks remain where they are until they thoroughly recover from the drenching rain.

Fishermen Warned.

In answer to a number of inquiries he has received re fishing at Cottage Lake (Edmonton Beach), R. T. Todd, inspector of fisheries, wishes to state that fishing is not allowed in this lake. This body of water is closed to fishermen until Nov. 20 next, with the possibility that the close season may be extended to May 15, 1929.

A Permit to Farmers.

Farmers who are having their crops destroyed by the ducks may protect themselves by securing a permit from Mr. Renj. Lawton, Chief Game Commissioner, Edmonton.

The application should be made in the form of a letter to the department, giving the location of the farm and other particulars. Pending receipt of official sanction, the nearest Provincial Police detachment should be informed by the farmer that he has applied for a permit. It would appear that he may protect himself in this way, even if the permission to shoot has not yet been received from the department.

Mewassin School Returns.

The four pupils who wrote grade 8 departmental exams. at White Whale school were successful in passing. Their names and respective averages are as follows: Ethel Mildred Atkins 91.6 p.c.; Leona Scheideman 82; Katherine Dewald 76; Katherine Schnell 73.

Spruce Grove News

Threshing is now under way in this district, with the Fuhr Bros. and M. Dueholke leading the bunch.

Arrangements are being made to hold a social next month in connection with St. Joseph's Parish.

The U. G. G. announce a patronage dividend payment of 1c a bu. Holders of patronage dividend receipts should present these to be cashed at elevator where grain was delivered.

Paul Kulak has joined the Swift brigade, vide W. Graden, promoted to the Threshers' battalion.

The Master Touch

One block of our village received a brightening up last week when the Massey-Harris implement had got a coat of paint. Mr. Bradbury applied the master-touch with beautiful crimson and gold lacquer. Hay Lake Times.

The Domestic Animals Act (Municipalities)

Sale and Redemption of Impounded Animals.

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that 1 Sorrel Mare, weight 900 pounds, branded "P-1" on left thigh, was impounded in the pound kept by the undersigned, located on the NW Qr. Sec. 10, Twp. 53, Range 1 & 5, J. W. Edkins, Stony Plain, on the 12th day of August, 1928, and that the said animal was sold to Frank Schulte, of Wabamun, and that the said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the Municipality and the purchaser of the above-mentioned animal. This Notice will appear in the Gazette of July 16th.

For information apply to the undersigned.
